

OIL AND GAS EXPLORATION

**ENERGY, RESOURCES
AND INFRASTRUCTURE
SPECIALISTS**

SERVICES SUMMARY

RLMS has extensive experience in dealing with legislative compliance for petroleum activities and can assist in all phases of project development from exploration through to production and rehabilitation. Oil and gas (including coal seam gas) exploration and development in Queensland is subject to the *Petroleum and Gas (Production and Safety) Act 2004* and the *Petroleum Act 1923*. Environmental aspects of petroleum activities are administered under the Environmental Protection Act 1994.

RLMS staff have significant experience with preparing applications for all petroleum authority types under petroleum legislation. Additionally we can provide tenure management services that include report preparation, government approval processes, updating Environmental Authorities and legislative compliance assessments. In coordination with our infrastructure and land services, RLMS can also carry out pipeline route identification and landholder negotiations.

RLMS can identify the key issues impacting on the approval of your project, and develop strategies to take your project from concept to implementation.

Oil and gas services include:

- Tenure Management:
 - Applications / Renewals
 - Approvals
 - Work Programs
 - Statutory Reporting Requirements
 - Tenement Relinquishment
- Environmental Authority Approvals
- Gap Analysis and Legislative Compliance Assessments
- Government and Stakeholder Consultation
